

Complete Storage Solutions – Pallet Racking

Complete Storage Solutions Ltd
11 Orion Business Campus
North West Business Park
Ballycoolin
Dublin 15
Tel. (01) 821 0500
Email: lhodgins@completestorage.ie
Website :www.completestorage.ie

Conventional Pallet Racking Systems

Still the most common form of pallet racking system: The conventional pallet racking system layout provides unrestricted access to all pallets. Pallets stored in wide aisle racking are not subject to any restrictions in layout and are freely accessible at all times.

Even in a state-of-the-art warehousing operation the conventional pallet racking system is still the most common form of pallet storage. In any number of industries logistic companies appreciate the versatility of our **pallet racking**, which can be assembled as single or double depth racks.

All our racking systems are quickly and easily installed, efficient and conform with safety regulations.

Customer Testimonials:

To whom it may concern,

Complete Storage Solutions were very efficient with the work they carried out and the completed projects were of a high standard. The employees were very professional and there were no delays with inspections or work that needed to be carried out.

Regards
Elizabeth

To Whom It May Concern:

Having recently dealt with Complete Storage Solutions for a large warehousing project it was an absolute pleasure to deal with everyone in Complete Storage Solutions.

Complete Storage Solutions response in understanding our needs was immediate and the specification & pricing was handled extremely quickly and professionally. These main factors secured this project for Complete Storage Solutions against strong competition.

I would have no hesitation to recommend Complete Storage Solutions to any other company.

Yours sincerely
